**FOR IMMEDIATE RELEASE**

**Golden Eagle's CEO Discusses Company's  
\$1 Million Gold Production Loan Commitment on  
Conference Call and Webcast**

SALT LAKE CITY, UTAH—(BUSINESSWIRE)---March 12, 2007---Golden Eagle International, Inc. (OTCBB: *MYNG*) announced today that a recording of its Conference Call and simultaneous Webcast from Thursday, March 8, 2007, discussing the Company's future plans and announcing a \$1 million gold production loan commitment are now available on Golden Eagle's home page at [www.geii.com](http://www.geii.com). The Conference Call alone can be accessed by dialing 1(641) 985-5053 (note that this is not a toll-free call) and entering the access code: 958041#, while the Webcast with the recorded narration is available by simply clicking the indicated icon on Golden Eagle's home page. (*See also*, Golden Eagle's press release on Friday, March 9, 2007.)

The Company signed an agreement for a \$1 million loan on March 8, 2007, which would fund the expansion of its C Zone pilot gold recovery plant into a full-scale commercial production plant. The Company plans to use the loan proceeds to incrementally expand the plant capacity to five hundred cubic meters (approximately 1,000 tonnes) per day on the Company's C Zone gold project in eastern Bolivia. Golden Eagle has already received an initial deposit of \$100,000 in loan proceeds, with the commitment of an additional \$100,000 by March 21, 2007, and the balance of \$800,000 contingent on completing due diligence at any time within a 60-day period from the date of the agreement. In addition, within this due diligence period Golden Eagle must provide the lender with a Certification Regarding Final Feasibility of its C Zone expansion, which

is still pending before final construction could begin. The loan agreement's term for repayment is 12 months and accrues interest of 10% per annum payable at the end of the one-year term.

The loan commitment comes after Golden Eagle estimated in February of 2007 that the most sampled core area of its eluvial gold deposit in the C Zone contained 630,000 m<sup>3</sup> (approximately 1.26 million tonnes) of mineralized material averaging gold grades of 460 mg/m<sup>3</sup>, but with a range as high as 1,400 mg/m<sup>3</sup> and a cutoff grade of 100 mg/m<sup>3</sup>. Contingent on finalizing its feasibility certification to its lender, Golden Eagle's mine plan calls for the use of data gathered from 200 auger drill holes and 65 shaft-style pits, as well as 4 months of confirmation pilot operations, to focus its initial mining on several high-grade areas identified within the C Zone.

**CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS AND RISKS**

Some of the statements in this press release, and the Conference Call/Webcast that are announced in this release, are forward-looking statements and are based on an assumed set of economic conditions and courses of action, including: (a) whether Golden Eagle' will be able to obtain sufficient financing to continue to meet its operational goals; (b) estimates of mineral reserves, mineralized material and future production levels; (c) expectations regarding estimated mine production costs taking into account higher petroleum prices, expected trends in mineral prices, and statements that describe Golden Eagle's future plans, objectives or goals; (d) uncertainties that result from actions that may be taken in Bolivia relative to increases in the Complementary Mining Tax, Corporate Income Tax or the amount paid for mining patents [claims fees] in the future; (e) uncertainties that result from social and political conditions in Bolivia; and (f) other risk factors and matters disclosed in Golden Eagle's Securities and Exchange Commission ("SEC") filings which may be accessed at [www.sec.gov](http://www.sec.gov). There is a significant risk that actual

material results will vary from projected results depending on such factors as changes in general economic, social and political conditions in Bolivia and financial markets; changes in gold and copper prices; technological and operational hazards in Golden Eagle's mining and mine development activities; uncertainties inherent in the calculation of mineral reserves, mineral resources, mineralized material (which has the lowest level of technical confidence) and metal recoveries; the timing and availability of financing; governmental and other approvals, and other risk factors listed from time-to-time in Golden Eagle's Form 10-K and its other reports filed with the SEC. The \$1,000,000 loan commitment and the mining projects/related evaluations described in this press release, and the Conference Call/Webcast, should not be construed by any means as an indication of the present or future value of the Company or its common stock. Additionally, the \$1,000,000 loan commitment described above and our plans with respect to the Buen Futuro A Zone gold and copper project, as well as the B & C Zone gold project, should not be construed by any means as an indication of whether we will ever conduct successful mining operations in connection with those projects. Golden Eagle disclaims any responsibility to update forward-looking statements made herein.
